

BRENDON SCHIMMELPFENNIG DA SILVA

Full-Stack Developer · React.js · Node.js · MongoDB · AI-Powered Development

Brazil (Remote — Open to Global) | brendon.dasilva03@gmail.com | linkedin.com/in/brendon-silva | github.com/BrendonSSilva

SUMMARY

Full-Stack Developer with 3+ years building scalable web platforms, RESTful APIs, and responsive interfaces — from Figma wireframe to production deploy. Founder and sole engineer of LocalZoom, a live SaaS directory platform generating recurring revenue. I integrate AI (Claude API, GPT-4, Gemini, DeepSeek) into real product workflows — shipping autonomous agents, not just using AI as a writing tool.

EXPERIENCE

Full-Stack Developer · Founder · [LocalZoom \(localzoom.com.br\)](https://localzoom.com.br)

Apr 2024 – Present

- Architected a freemium SaaS directory platform from scratch (Node.js + Express + MongoDB) — live in production with active listings and monthly recurring revenue.
- Built a complete RESTful API with JWT authentication, multi-level permission control, and file uploads — zero security incidents in production.
- Delivered pixel-accurate responsive UI from Figma prototypes using vanilla CSS, with on-page SEO optimization — no handoff, full ownership from design to code.
- Engineered an autonomous WhatsApp sales agent (Evolution API + n8n + Claude API) that handles B2B/B2C flows and sends PIX payment links without human intervention.
- Maintained continuous delivery via Vercel + Git — new features shipped in under 24 hours.

Full-Stack Developer · [AGEDES Web Solutions](#)

Nov 2022 – May 2023 | May 2024 – Feb 2025

- Delivered 8+ custom web systems end-to-end (real estate, inventory management) with PHP, MySQL, and Bootstrap 5 — covering design, back-end, and deployment.
- Cut landing page delivery time by ~40% by building a reusable component library in Bootstrap 5 + JavaScript.
- Translated Figma layouts into pixel-perfect HTML/CSS/JS, ensuring visual consistency between design and final product across all client projects.

Full-Stack Developer · [SLS TEM → LocalZoom \(Own Project\)](#)

Nov 2023 – Mar 2024

- Launched a functional SPA with React.js + Nullstack.js in 4 months — prototyped in Figma, built front-end and state logic — validating the concept that evolved into the monetized LocalZoom platform.

Developer & Open Source Contributor · [Freelancer / Nullstack.js](#)

Feb 2023 – Nov 2023

- Contributed tests, optimizations, and the official Portuguese translation of Nullstack.js documentation, expanding framework accessibility for Brazilian developers.

TECHNICAL SKILLS

Front-end: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS/Sass, Styled Components, Bootstrap 5, CSS/JS animations

Design → Code: Figma (prototyping + handoff), pixel-perfect implementation, design systems, mobile-first to 4K responsiveness

Back-end: Node.js, Express.js, PHP, RESTful APIs, JWT, authentication & authorization

Databases: MongoDB, MySQL, PostgreSQL (basic), Mongoose

AI & Automation: Claude API, Claude Code, ChatGPT / GPT-4, Gemini, DeepSeek — production integration; n8n, Evolution API (WhatsApp)

Tools: Git, GitHub, Vercel, Docker (basic), Postman, VS Code

Languages: Portuguese (native) · English (fluent — technical & conversational)

EDUCATION & TRAINING

B.S. in Software Engineering · UNINTER · In progress

Advanced Node.js · MongoDB · Back-End with Express · React.js — OneBitCode (2024) | Full JavaScript, HTML5, CSS3, Bootstrap — B7Web (2022)

HIGHLIGHTS

Founder of 2 self-built platforms with real market validation · Full ownership: Figma → code → API → deploy · AI integrated in production (not just a productivity tool) · Open-source contributor (Nullstack.js) · Fluent English — technical & conversational
